## Tadas Andriuskevicius, PhD

## MOLECULAR BIOLOGIST

+447871610072 | tadasandriuske@gmail.com | Edinburgh, UK

SUMMARY	
Following the completion of my PhD and a necessary break to addresseeking to advance my career into the research of aging and longevity biology and hands-on research experience position me well for this resume. For a more detailed overview, please refer to my portfolio.	. My background in molecula
PROFESSIONAL EXPERIENC	CE
DECEADOLI ACCICTANT LTb a Llusius waits caf Falin be walls	Jan 2022   Dan 2022

**RESEARCH ASSISTANT** | The University of Edinburgh

Jan 2022 – Dec 2022

Following the successful defence of my PhD thesis, I was hired by my supervisor to finalize the project and publish the results.

- Conducted and coordinated ChIP-seq and time-lapse microscopy experiments that required the collaboration of multiple scientists from several groups.
- Authored and managed the manuscript through the publication process, including editor correspondence, file preparation, formatting, and revisions based on the reviewer feedback.

INTERN | AstraZeneca

Sep 2019 – Dec 2019

An internship in industry focused on genetic engineering – carried out as part of the EastBio doctoral training program.

- Investigated the therapeutic potential of the CRISPR-Cas9 system for treating a repeat expansion disorder.
- Evaluated the efficiency of a gene editing strategy in human cells.
- Participated in internal meetings on other gene-based therapies being developed in the company.
- Assisted colleagues with molecular cloning, strain screening, and the evaluation of gene editing efficiency.

INTERN | Max Planck Institute for Biophysical Chemistry

Jun 2016 – Aug 2016

A summer internship funded by the DAAD RISE Germany programme.

- Researched the role of miRNAs in dystrophin glycoprotein complex signalling and the pathogenesis of muscular dystrophy.
- Carried out RNA extractions, Drosophila dissections, and sample preparation for microscopy.

**INTERN** | Vilnius University

May 2014 - Aug 2014

A summer internship funded by the Research Council of Lithuania.

- Investigated the subcellular localization of a prokaryotic Argonaute protein in vivo.
- Carried out bacterial strain development and fluorescent microscopy.

----- EDUCATION -----

## PHD, MOLECULAR AND CELL BIOLOGY | The University of Edinburgh

2017 – 2022

Investigated the significance of Rad51 nucleoprotein filament regulation during DNA replication and repair.

## Tadas Andriuskevicius, PhD

BSC, BIOTECHNOLOGY	The University of Edinburgh	2013 – 2017
Achieved a first-class honors degree with the highest overall grade average in the School of Biological Sciences.		
PUBLICATIONS		
	Andriuskevicius <i>et al</i> . The inabilit nt mitosis and cell death. <i>Biomedic</i>	ty to disassemble Rad51 nucleoprotein cines 2023, 11, 1450.
<b>SCIENTIFIC REVIEW</b> Andriuskevicius <i>et al.</i> Putting together and taking apart: assembly and disassembly of the Rad51 nucleoprotein filament in DNA repair and genome stability. <i>Cell Stress</i> 2018, 2, 96-112.		
	AWARDS	
ROYAL SOCIETY OF BIO	DLOGY TOP STUDENT AWARD	The University of Edinburgh 2017
Awarded for achieving thin the School of Biologica		among all undergraduate programmes
THE BUCHANAN PRIZE	:   The University of Edinburgh	2016
Awarded for excellence in an undergraduate course Molecular Genetics 3.		
CERTIFICATES		
ICH GCP TRAINING CER	RTIFICATE   NIDA CCTN CTN	2024
GOOGLE DATA ANALY	TICS CERTIFICATE   Google + Cou	ursera 2023
INTRODUCTION TO QUANTITATIVE BIOLOGY   SysMIC.ac.uk 2020		
SKILLS AND EXPERTISE		
SCIENTIFIC SKILLS	Strain screening using PCR	Molecular cloning   Strain engineering     Handling of yeast and bacteria   tics   Data visualization and presentation riting
TECHNICAL SKILLS	Python   Microsoft Excel and PowerPoint   Web development	
SOFT SKILLS	Analytical thinking   Creative problem solving   Attention to detail   Time management   Project management   Teamwork	
LANGUAGES	English (fluent)   Lithuanian (nat	tive)   French (beginner)
